

Senior Software Developer

About Gospel Technology

Gospel Technology is creating a new category of data management platform that draws companies together, allowing them to securely share data, and effectively collaborate around that data. Underpinned by blockchain, Gospel Technology's solution allows data to be written, accessed and tracked with absolute trust and security.

Through the use of distributed ledger technology, Gospel has built a highly resilient platform which scales to meet the demands of some of the largest enterprises in the world.

Gospel is a fast-growing start-up based in the heart of Central London. We are Series-A-funded by IA Ventures and Salesforce Ventures, and already have a number of wins with leading UK and European companies in the manufacturing, human capital and pharmaceutical markets. Being an early-stage company, we are hungry, nimble and always seeking new opportunities to increase the value of our platform for our customers.

The mission

Do you have an innate need to get projects finished, to a high standard of which you can be proud? Can you deal gracefully with complex and possibly even conflicting requirements, always seeking clarity and a deeper understanding of your client's needs? Do you take ownership, work independently, and have superb attention to detail?

Gospel is looking for a Senior/Lead Software Developer with experience with Blockchain/DLT, ideally with knowledge about Hyperledger. You'll be working with the rest of the development team to design and improve new and existing functionalities within the Gospel platform.

Gospel is providing the first practical enterprise application of blockchain.

- IDC

What you'll be doing

- Design, create and improve new and existing functionalities within the Gospel platform
- Implement best practices in all areas of software development
- Participate in team and peer improvement plans
- Share knowledge of tools and techniques with the wider team, both developers and non-developers
- Be able to work in a fast-paced environment using Agile methodologies with minimal oversight or supervision
- Operate as a subject matter expert for Blockchain and DLT

Your background

- At least 5 years' experience as senior developer role, ideally utilizing Blockchain
- Strong analytical and problem-solving skills
- Computer Science or a degree in a related field
- Experience across a wide variety of languages and frameworks with a focus on Golang and Java
- Keen on Enterprise architecture and DevOps practices
- Experience working on Hyperledger products, specifically Fabric
- Knowledge of Docker, Kubernetes, GCP and AWS as a plus

Does this sound like you? We'd love to hear from you: careers@gospel.tech

Please note that if you are not contacted by our team within 2 weeks, it means that on this occasion your application has not been successful.
